Computer Science Engineering student with strong knowledge of Java, SQL, React.js, HTML, CSS, and JavaScript. Passionate about software development, web technologies, and problem-solving. Seeking an opportunity to work in a challenging environment where I can apply my technical skills, learn emerging technologies, and contribute to developing innovative and efficient software solutions while growing professionally.

EDUCATION

The Oxford College of Engineering, Bengaluru, India **2022 – 2026**
BE, Computer Science and Engineering CGPA: 8.75

Nalanda PU College, Jagalur, Davangere, India(11, 12 th) **2020 – 2022**
Senior Secondary(XII) Percentage : 90.5%

Bala Bharathi School, Jagalur, Davangere, India(10 th) **2020**
Secondary(X) Percentage : 90.05%

TECHNICAL SKILLS

Languages : JAVA, SQL, JavaScript
Frontend : HTML, CSS
Databases : MySQL , OracleSQL
Tools & Platforms : Git**,** GitHub, VS Code, Eclipse

PROJECTS

AI-Powered Resume Builder with Role-Specific Content Suggestions : | Link

- Developed **EliteResume**, an AI-powered resume builder application for creating ATS-friendly and role-specific resumes.
- Built the frontend using **React, JavaScript, HTML, and CSS** with responsive UI design.
- Integrated **Google Gemini AI API** to generate professional objectives and role-specific project and experience descriptions.
- Developed AI-based resume optimization using company job descriptions for better ATS compatibility and resume preview and **PDF generation/download** functionality for professional resume export.

MediSlot — Smart Doctor Appointment Booking System : | Link

- Developed a full-stack doctor appointment booking system using **Java**, **HTML, CSS, Javascript, MySQL**.
- Designed doctor verification and approval workflow where admins validate doctor credentials before slot creation and bookings.
- Added admin functionalities for managing doctor approvals, user accounts, medical specializations, and appointment statistics dashboards.

Smart infrastructure for in-motion EV Charging : | Link

- Designed and implemented an **in-motion wireless EV charging** prototype using **inductive power transfer**.
- Integrated **NodeMCU ESP8266** with **ThingSpeak** cloud platform for real-time IoT monitoring and analytics.
- Developed transmitter and receiver coil systems for dynamic contactless energy transfer.
- Implemented **voltage, temperature**, and **battery** monitoring for safe and efficient charging operations.
- Built a smart charging infrastructure model to reduce charging downtime and improve EV mobility efficiency.
- Used **Embedded C**, IoT sensors, power electronics, and wireless communication modules for system integration.

EXPERIENCE

Web Development with GenAI Intern at Rooman Technologies – (Feb 2026 – June 2026) | Link

- Worked on an **AI-Powered Resume Builder with Role-Specific Content Suggestions** project using modern web development technologies and AI-based functionalities.
- Developed and integrated frontend components using technologies like **HTML, CSS, JavaScript, and React.js** for creating responsive and user-friendly interfaces.
- Worked on backend development concepts using **Java, JDBC** for application logic and database connectivity.
- Improved problem-solving, debugging, teamwork, and project management skills through practical implementation and regular project activities.

CERTIFICATES

- Java Programming Certification – Udemy (2025) | Link
- SQL Bootcamp – Udemy (2025) | Link

ACHIEVEMENTS

- Selected for the KSCST 49th Student Projects Programme for the project "Smart Infrastructure for In-Motion EV Charging" based on innovation and technical implementation.
- Successfully completed internship training in Web Development with Generative AI.

LANGUAGES

English, kannada, Telugu
